- **Programming and Scripting:** JavaScript, Java
- **IDE /Tools:** VSCode, IntelliJ.
- **Databases:** MYSQL, MongoDB.
- **Methodologies:** Waterfall, Agile.

## Experience

April 2021– Present

[Web Developer](#) / Labhanya Infotech, Nagpur, India

I am working with other developers to build technical solutions & and complete projects to budgetary and quality requirements. I am mainly responsible for the development and maintenance of software projects by writing clean, reusable, fixing bugs and scalable code that adheres to best practices and standards, while working collaboratively in a team environment to ensure smooth development and deployment.

### Duties:

- Development of JavaScript interfaces & Configuration Management.
  - Developing new applications, components & functionality to existing systems.
  - Involved in accurately providing estimated development times.
  - Developing new functionalities, at frontend.
  - Creating a responsive user interface involves designing and developing.
  - Explored emerging requirements and incorporated relevant plugins to align with evolving project needs.
  - Integrated backend APIs at the frontend.
  - Analyzing system flows, data usage, and work processes and investigating problem areas
  - Investigating alternate configurations & implementing better solutions.
  - Used Agile Development methodology of software development.
  - Learned company standards of application software development
- 

## Project

### 1. Data builder

**Duration:** November 2022 to Present

**Description:** The Task Management Data Builder is a comprehensive solution for efficient task management, seamlessly integrating a task interface with ChatGPT. It introduces voice input, and Google Drive document uploads, and enhances user experience. With multi-task management and product tracking features, users assign tasks, track progress, and manage products seamlessly. Status indicators boost visibility. Streamline tasks and optimize management with this innovative software.

**Technology:** HTML5, CSS3, JavaScript, ReactJS, NodeJS, ExpressJS, MongoDB, TypeScript, Redux Toolkit, Axios, NestJS.

#### Roles:

- Managed full-stack MERN project, overseeing frontend and backend aspects.
- Integrated Language Model (LLM) for cohesive functionality.
- Seamlessly linked backend APIs to frontend for unified performance.
- Played a key role in enhancing the React web app with Node.js backend.
- Developed REST API endpoints and implemented JWT authentication.
- Proficiently utilized Redux Toolkit for streamlined state management.
- Demonstrated expertise in Bootstrap for responsive design and layout.
- Skillfully managed Git version control, encompassing branching, merging, and conflict resolution.

## 2. POS (Point of Sale)

**Duration:** June 2021 to August 2022

**Description:** A restaurant POS software is a point-of-sale system that processes the transactions that happen at a restaurant. Initially, a traditional point of sale was just a restaurant billing software that accepted orders and generated a receipt. However, with the advent of cloud technology, the humble POS system evolved to become a complete restaurant management system. Armed with Stock and inventory Management, Smart Reporting and analytics, Customer Relationship Management, and more, a restaurant POS reduces manual labour and simplifies operations. Add to these integrations with the various third-party applications such as Online Ordering, E-wallets, Table Reservations, Loyalty

Programs, etc., and the restaurant POS machine becomes an end-to-end solution for restaurant management.

**Technology:** HTML5, CSS3, JavaScript, ReactJS, Axios, SCSS, JQuery.

### Roles:

- Supported React web app maintenance and development.
- Grasped project data flow and requirements.
- Seamlessly linked backend APIs with frontend.
- Proficient in Bootstrap for responsive web development.
- Produced clean and scalable code in accordance with industry best practices.
- Skillfully managed Git version control, encompassing branching, merging, and conflict resolution.
- Collaborated effectively in a team for smooth development.
- Contributed to software projects' upkeep and growth.

---

## Education

June 2021

Bachelor of Sciences with a percentage 57.51% / Rashtrasant Tukadoji Maharaj Nagpur University, India
